MEET BOLON RUGS

This collection combines the benefits of Bolon flooring with the versatility of a rug, making design possibilities nearly endless. The made-to-measure rugs are easy to clean and perfect for spaces where wall-to-wall coverings are not suitable.

- Made-to-measure - minimum 2 x 2 m, maximum 4 x 8 m (different sizes on request)
- Eight woven vinyl trimming options
- More than 80 original designs & two exclusive collections
- Personalization with Bolon by You (minimum order quantity 50 m²)
- 1-year warranty

Bolon Rugs Truly: #1 / ANYTHING EVERYTHING

Bolon Trimmings: f.t.b.: Solid Brown, Solid Grey, Solid Black, Solid Beige, Melange Grey, Melange Beige, Stripe Sand Gloss, Stripe Steel Gloss

DESIGN & SIZE

Our rugs can be produced in our Bolon Original and in Bolon by You collections, giving you the freedom to experiment with colours, patterns and designs. A key benefit of our rugs is the flexibility of its size. The rug can be made to fit your interior perfectly. With the right size and design, the rug will enhance the overall expression of your space.

Design possibilities:

- More than 80 Bolon Original articles
- Personalization with Bolon by You (minimum order quantity 50 m²)

TRIMMINGS

The rugs are tied together with uniquely designed trimmings. Made from Bolon yarn, the trimmings share all the practical benefits and tactile expression of Bolon flooring.

Trimmings:

- Eight different options in design and colour
- practical benefits from woven Vinyl

Bolon Rug Artisan; Quartz

Bolon Original includes our standard collections, all designed and manufactured by the Bolon design team in Ulricehamn. For your personal rug, you can choose from all Bolon Original collections, which are available as rolls.

The rugs are produced on demand, giving you the flexibility to play with size and design.

- Allows architects and designers to create custom made rug designs
- 11 collections in 89 variants can be combined with eight different trimmings
- Environmental certifications and declarations are available

Bolon Rug by Patricia Urquiola; Grey Sashiko, Sage Sashiko

Bolon by Patricia Urquiola is a high-quality design collection that combines outstanding durability with refined softness and character.

Characteristic of the collection is that it shows off the weave structure of the material and traditional stitching techniques. Four colour variations offer a textile surface that is particularly convincing in hotels, offices and other public spaces.

The rug designs are coordinated with edge binding bands in harmonizing colours.

- Architectural sophistication combined with the softness of textiles
- Each rug has pre-selected trimming that harmonises with the colour
- Environmental certifications and declarations are available

Bolon Rug by Jean Nouvel; NO.1

Bolon by Jean Nouvel is a collection inspired by architecture and spatial geometry. Choose from six colour options and experiment with layout and natural spatial effect. Two colour-coordinated trimmings are available for the collection.

- Linear design for spatial geometry
- Each rug has pre-selected trimming that harmonises with the colour
- Environmental certifications and declarations are available

Bolon Rug By You; Stripe Black Steel Grey

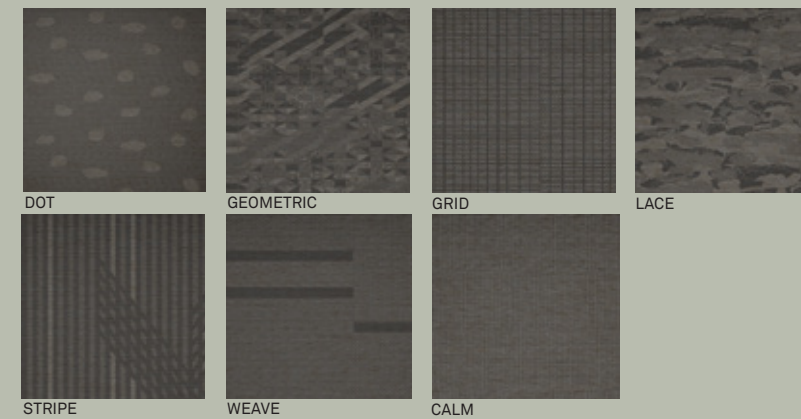

We know that every interior project is unique and sometimes requires tailored solutions. That is why we created Bolon By You: a design system that gives you the freedom to easily create personalised rugs.

The concept allows you to create designs by combining different patterns with warp and weft colours. Bolon By You rugs have a minimum order quantity of 50 m².

STEP BY STEP

- Choose a pattern
- Choose from 4 available warp colours
- Choose from 12 available weft colours

PATTERN

WARP / vertical yarn

WEFT / horizontal yarn

- Minimum order quantity 50 m²
- Order a sample of your personalised design at [bolon.com](https://www.bolon.com)
- Lets architects and designers create personalised flooring
- Eight different trimming options
- Environmental certifications and declarations are available

BEAUTY WITH BENEFITS

Bolon is a Swedish design brand specialized in innovative flooring and rug solutions for public spaces. All products are developed and produced in Sweden, focusing on sustainability, functionality, and design.

DESIGN

Design is at our core, and we are always on the look - out for new trends. We find our inspiration in art, fashion, photography, and interior design and use it to create high-end design products. Our rug collections are all results of a combination of aesthetics and functionality. All products are based on the characteristic Bolon yarn and the woven three-dimensional structure.

SUSTAINABILITY

Our production site in Ulricehamn is climateneutral using only renewable energy and has an integrated recycling plant. Here, production waste is being recycled into new backing layers. Our PVC material is solely bought from Best Environmental Practice PVC suppliers.

DURABILITY

Bolon rugs are durable, strong and retain their appearance without flattening, making it a perfect solution for high-intensity commercial environments.

CLEANABILITY

Bolon rugs are impervious and resilient against spills. The compact weave prevents dirt and debris from penetrating the surface. Daily cleaning can easily be performed with a vacuum cleaner, brush, mop, and clean water. Most often, no harmful chemical agents are required. If needed, rugs can be disinfected.

INDOOR ENVIRONMENT

Bolon rugs are inherently hypoallergenic which ensures better indoor air quality. The rugs are also free from hazardous plasticizers and stabilizers.

Bolon Rug Truly; #1 ANYTHING EVERYTHING

DESIGN AND FUNCTIONALITY

The unique layered structure of Bolon rugs provides its impressive durability qualities. The top layer is made from Bolon yarn, creating the characteristic Bolon look and resilience of the rug. The backing layers enhance the product performance, adding stability and improving its imperviousness.

WARRANTY

Bolon rugs come with a 1-year warranty.

WATER RESISTANCE

Bolon rugs are water resistant and do not allow water to penetrate. However, it shall not be used as a waterproofing/sealing layer in areas like bathrooms.

NON-SLIP

Bolon floors are tested according to DIN 51130 and comply with the slip resistance R9 and R10.

ANTI-STATIC

Bolon rugs do not generate a static charge, but they cannot be classified as an electrostaticdissipating floor. Our floors have been tested and fulfil the requirements of the European Directive EN 1815.

FIRE RATING

Bolon rugs comply with the requirements in the European standard EN 135011 (fire classification of construction products) and has achieved the rating just below non-combustible material. This classification is called BflS1 and includes both fire and smoke production. Bolon rugs are approved for emergency exit routes in Sweden.

HYPOALLERGENIC

Bolon rugs are impervious to liquids and has no exposed fibres where dust, dirt or debris can hide. The result is a rug with less risk for mold spores to thrive. Our rugs are recommended by the Norwegian Asthma and Allergy Association as they contribute positively to indoor air quality.

A CLOSE UP OF THE PRODUCT

Bolon rugs are structured with four levels: one top-weave and three backing layers. The four layers provide the product with its unique qualities. The weave layer is formed by vinyl warp and weft threads woven together tightly. The variations of the warp and weft yarn together with the different weaving techniques gives Bolon rugs its vast design possibilities.

THE WARP

The warp is the longitudinal vinyl yarn that together with the weft forms the weave. Two different kinds of warp can be used in Bolon rugs: extruded or folded.

The extruded warp can either be elliptical or profiled and is used in the jacquard loom, it comes in solid monochrome colours. The folded warp comes in solid monochrome or metallic shades and is used in the dobby loom.

THE WEFT

We extrude our own Bolon weft yarn at our production plant in Ulricehamn. Each thread is extruded into a mono or co-ex line, each with polyester core. There are four different kinds of Bolon weft yarns: monochrome, mixed mono, glossy or mixed glossy, all of which can be produced in any colour.

THE WEAVE

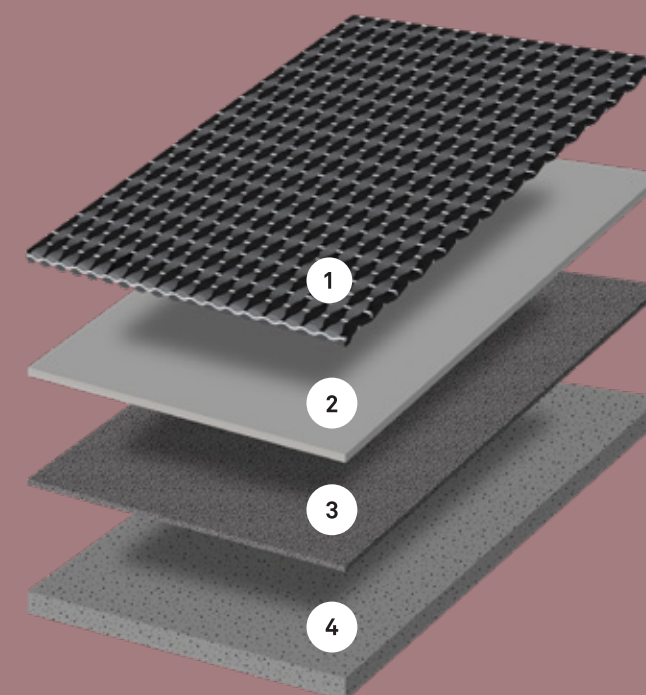

At Bolon, we use two types of looms: the dobby and the jacquard. The dobby loom is less complex, creating plain surfaces without any patterns. The result is a classic woven expression.

The more advanced jacquard loom allows us to create both unpatterned surfaces as well as bold patterns, making design possibilities nearly endless.

LAYERS

1. The weave layer consists of vinyl warp and weft yarns tightly woven together
2. The upper backing layer gives the rug its fire-protective properties
3. The middle backing layer consists of glass fibre giving the rug dimension and stability
4. The bottom backing layer defines the thickness of the rug and contains recycled material.

CLIMATE. CIRCULAR. PROMISE.

SUSTAINABILITY

As a business, Bolon has always taken pride in doing things in our own way. As each generation of the company has left its mark on our history, we can look back on decades of development and sustainable innovation with a great sense of achievement.

All our collections contain recycled material – our integrated recycling plant help us to increase the levels of recycled material year by year. In our production, we only use renewable energy with zero climate footprint. Our additives are non-hazardous, and the PVC material is environmentally labelled.

In 2020, we set bold new climate and circularity goals which we have chosen to call our "Promise".

OUR PROMISE

By 2028, all the flooring and rugs we produce will be 50% circular.

By 2028, we will halve the climate impact of our flooring and rugs.

PRODUCTION

All our products are produced in Sweden with a closed-loop water cooling system. Our integrated recycling plant gives us a great opportunity to include recycled material in all products and continuously increase the percentage used.

CIRCULARITY

All our collections and products contain an average of 28% recycled material, according to ISO 14021.

CLIMATE

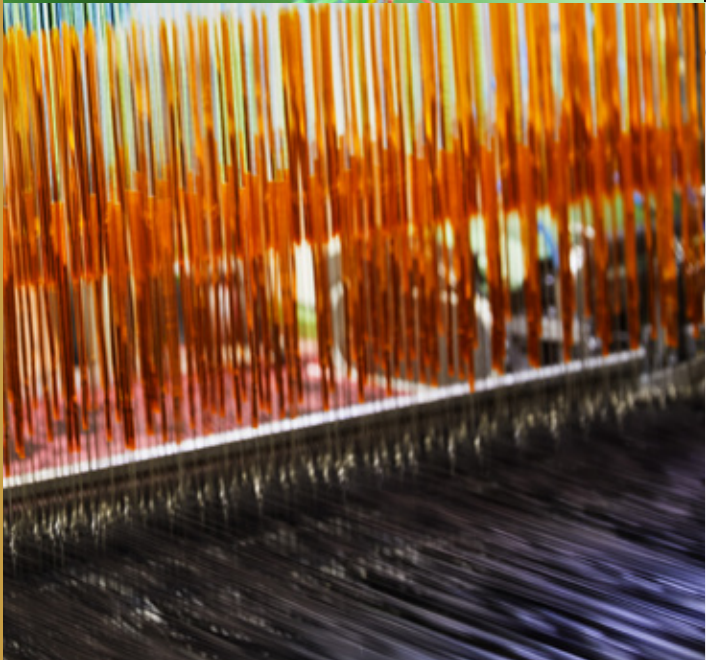

We have third-party verified EPDs (Environmental Product Declarations), which provide transparency and comparability of our products’ climate impact. Our factory runs on 100% renewable energy making our production climate neutral.

MATERIAL

The materials used in our rugs are 79% fossil-free and consist of chalk, PVC, glass fibre and non-hazardous additives. We only use environmental labelled PVC. The PVC compound, thread and foil are primarily sourced within 250 km from the production plant.

CHEMICALS AND VOC EMISSIONS

Our products are free from heavy metals and hazardous phthalates and fulfills strict requirements of VOC (Volatile Organic Compound) emissions during use.

EASY TO CLEAN

Bolon rugs are simple to clean and maintain. Thanks to the tightly woven vinyl-structure and the layers of solid backing, the rugs are impervious to liquids and resilient enough for almost any spill or mess.

EASY TO CLEAN AND MAINTAIN

One of the key benefits of a Bolon rug is its ease in cleaning and maintaining. The vast majority of cleaning can be accomplished with a vacuum cleaner and scrubbing brush.

ECO-FRIENDLY CLEANING

During the long product lifecycle of Bolon rugs, 99% of the cleaning can be accomplished with clean water.

STAIN REMOVAL

With Bolon rugs, stain removal is straight forward. Most of the times, all you need is warm water, a scrubbing brush and a dry cloth. It is best if the stains are treated right away. Before you use a stain remover, make sure it can be used on vinyl flooring.

DISINFECTION

If needed, the rug can be disinfected. If so, make sure to rinse away all chemicals to avoid any damage to the floor.

PLACEMENT

Note that Bolon rugs do not allow moisture to pass through. When placed on a floor designed to breathe, damage can occur if moisture is trapped.

STAIN	CLEAN WITH
Chocolate, fat, juice, cream, coffee, beer, wine	Hot water + strong cleaner
Asphalt, oil, shoecream, chalk, ink	Chemically pure petrol
Water-based glue	Hot water
Solvent-baset glue	Chemically pure petrol
Marks from shoes	Rub dry with cloth
Chewing gum	Hot steam or freeze spray

CERTIFICATIONS & DECLARATIONS

Our products and processes have been awarded stringent environmental certifications for buildings. These third-party verified certifications are one way of demonstrating and communicating the environmental quality. Our declarations provide transparency and availability for everyone. Because Bolon operates in many different markets, we have many different certificates and declarations.
