## BOLON R CLEANING AND MAINTENANCE INSTRUCTION

### GENERAL ADVICE

- Make sure all table and chair legs have furniture pads without sharp edges and that they are made from stainless steel, polythene or similar. Prevent unnecessary wear and tear as well as discolouration by having hard poly-amide chair wheels.
- Some kinds of rubber similar to the type used for rubber cartwheels, welcome mats etc. may cause discolouration in the form of migration. These kinds of discolourations cannot be removed.
- Our rugs are water-resistant and are cleaned using wet methods.
- Do not use acetone or polish on Bolon R.
- Most cleaning needs can be accomplished with a vacuum cleaner, scrubbing brush, water and a minimal dose of stain remover.

### PLACEMENT

Start by rolling out the rug with the upside facing down. Then turn the rug over by lifting the edge of the shorter side and walk with it towards the opposite side. Before placing furniture, the rug needs to adapt to the indoor temperature, wait until all bumps and creases has disappeared.

Note that the rugs are solid and do not let moisture through. Floors that are constructed to breathe might be damaged when moisture is trapped in.

## BOLON R CLEANING AND MAINTENANCE INSTRUCTION

### DAILY CLEANING

Vacuum clean

### WET STAINS

Absorb the stain with paper or cloth. Then wipe the surface with a damp cloth. If necessary, use a small dose of a neutral all-purpose cleaner or dish soap. Be careful to wring out the cloth properly before wiping.

### DRY STAINS

Dissolve the stain with a damp cloth. If necessary, use a brush. A small dose of a neutral all-purpose cleaner can be used on more difficult stains, leave the cleaning agent on the stain for a couple of minutes before using a brush. Finally, wipe the surface dry, make sure no cleaning agent is left on the surface.

### PERIODICAL CLEANING FOR PUBLIC SPACES AND LARGER RUGS

- Start by vacuuming.
- Use a combi or orbital cleaning machine with soft brushes/pads and lukewarm water (or ultra-pure water if possible). Stains should be pretreated with a neutral all-purpose cleaner before using the machine.

Be aware that the underlying floor might be sensitive! Always clean the rugs on water-resistant surfaces. If water gets in under the rug, it can damage the underlying flooring, e.g. wood floors/parquet etc.

Smaller rugs can be removed and cleaned elsewhere with water or a pressure washer.
