

# LIGHT REFLECTANCE VALUE - LRV

## WHAT IS LRV?

LRV is measured on a scale that ranges from zero (absolute black, absorbing all light and heat) to 100 percent (pure white, reflecting all light). Building and design professionals (everyone from architects and engineers to interior designers and color consultants) use these measurements as guidelines to predict how light or dark a color will appear.

Factor Y, is the physical value of the quantity of light energy reflected by a surface, expressed as the percentage of light reflected under the same conditions by a perfect reflecting diffuser. Y, is based on a scale of 0 to 100, where zero = black and therefore represents total light absorption and white = 100 and therefore total light reflection.

(Test method BS 8493)

	RGB	LRV
	0, 0, 0	0
	205, 38, 44	16
	92, 162, 91	30
	255, 189, 0	62
	255, 255, 255	100
